

THE BETTER CHOICE FOR YOUR FORKLIFTS

Forklifts powered by gas offers your business less engine noise and increased fuel savings when compared to the traditional petrol or diesel operated forklifts. At Fiji Gas, we can provide you with easy refuelling options for your forklift operations.

Benefits of Fiji Gas for your Forklifts Minimal Refuelling Downtime

- There is minimal downtime for refuelling your LPG forklift when compared to battery powered forklifts.
- We can provide safe cylinder storage options on your site to allow for quick exchanges when you need it and will put you on a cylinder exchange delivery schedule to meet your operational needs

Eco-Friendly for a Healthier Work Environment

- Less green house gas emissions than petrol or diesel, creating a healthier air environment for your business and reduces your impact on the environment.
- Our team of experienced representatives can provide you with the right LPG solutions for your business.
